DEFINITIONS AN	D GUIDELINES
intended users of the appraisal are only the appraiser's client and the employer. The purpose of the appraisal is to develop an opinion of the Anticipated Sales Price for a relocating employee's residence. Scope of Work: The scope of work includes performing an interior and exterior appraisal inspection of the subject property; collecting, verifying and analyzing pertinent data; considering market trends; developing an opinion of the subject property's Anticipated Sales Price utilizing Forecasting, and communicating the findings in this Summary Appraisal Report. The appraisal is to be developed utilizing only the Sales Comparison Analysis, which most accurately reflects the actions of typical buyers and sellers in the market place. This approach must include an analysis of competing properties, pending sales and closed sales, resulting in a reliable opinion of Anticipated Sales Price. The cost approach, income approach, and highest and best use analysis are excluded as they are not necessary to develop a credible opinion of Anticipated Sales Price. Definition of Anticipated Sales Price*: The price at which a property is anticipated to sell in a competitive and open market, assuming an arm's length transaction whereby: 1. The analysis reflects the subject property's appearance "as is" (or as instructed by the client) and is based on its present use as a residential dwelling. (For new construction not completed see Guideline 1d.) 2. Both buyer and seller are typically motivated; both parties are well-informed or well-advised and acting in what they consider their best interests. 3. Payment is made in cash or its equivalent. 4. An assignment marketing period, not to exceed 120 days (or as instructed by the client) and commencing on the Date of Value Opinion, is allowed for exposure in the open market. The analysis assumes an adequate effort to market the subject property. 5. Forecasting must be applied to reflect the anticipated market trends. (In order to reflect any impact these trends will have a cale a	competing properties, pending sales, comparable sales, supply and demand, availability and terms of financing, location, and overall market conditions. Also, consider and make necessary adjustments for other pertinent factors. 3. Adjust the sales prices of the comparable sales for seller concessions to reflect a cash equivalent price. Dollar adjustments should be made for concessions such as: seller-paid points, buyer's closing costs, interest rate buy downs, seller financing, or any other terms that influence the final sales price. These adjustments are not necessarily dollar for dollar and should reflect the impact on the sales price resulting from the concession. 4. Assume the subject property is free and clear of all liens with the owner of record responsible for satisfying any unpaid installments of special assessments. 5. Calculate the gross living area (GLA) of the residence in square footage, using exterior measurements (except condominiums and cooperatives). GLA is generally limited to the habitable above-grade living area only. Basement and attic areas (finished and unfinished) are not included in GLA, bedroom and bath counts. However, they may make a valuable and significant contribution to the property value, and should be calculated and shown separately in the report. 6. Rate the various attributes of the subject property, using the terms "excellent," "good," "average," "fair," and "poor." In doing so, compare the characteristics to those of competing properties and neighborhoods (e.g., a luxury, custom-designed home may be rated "average" as compared with competing properties that also are luxury, custom-designed homes). The ratings are defined as follows: Excellent: the amenity or characteristic is superior to the same characteristic found in competing properties and neighborhoods; Good: the amenity or characteristic is better than the same characteristic found in competing properties and neighborhoods; Average: the amenity or characteristic is not as quot as the same characteristic
impact these trends will have on the subject property's marketing time and sales price, a forecasting adjustment must be consistently applied to each comparable sale). Extraordinary Assumption: The Anticipated Sales Price assumes that no physical changes have occurred to the subject property between the Date of Appraisal Inspection and the Date of Value Opinion. The use of this assumption may affect the assignment results. Guidelines: In developing an opinion of the Anticipated Sales Price, the appraiser must: 1. Consider the subject property's appearance "as is" (or as instructed by the client) on the Date of Value Opinion with adjustments made to reflect reactions from a typical buyer's point of view. These adjustments should reflect the comparative differences between the subject property's appearance and similar properties in that market. The actual cost to cure may not be the appropriate measure for this adjustment. Consider the effect on value (positive or negative) of the following	 □ Fair: the amenity or characteristic is not as good as the same characteristic found in competing properties and neighborhoods; and □ Poor: the amenity or characteristic is considerably inferior to the same characteristic found in competing properties and neighborhoods. 7. Include the following exhibits: a) photos of the front, rear, street, and interior of the subject property; b) photos of the subject property depicting any adverse conditions and inspection concerns; c) photos of factors within view from the subject property that significantly affect marketability either favorably or unfavorably; d) photos of all competing properties and comparable sales; e) a sketch of the dwelling indicating all measurements and calculations necessary to determine gross living area. Sketch should also show room locations; and, f) a map depicting locations of the subject property, competing properties and

 Do not discuss appraisal opinions or reveal sensitive information to anyone other than the client. Notes: Deviation from the Definitions and the Extraordinary Assumption is not permitted as they are necessary to develop a credible opinion of Anticipated

8. Do not solicit a listing or generate a referral as a result of an appraisal

Sales Price. Deviation from the **Guidelines** is not permitted without client approval and must be specifically disclosed in this report.

a) condition (e.g., modernization, restoration, repairs, necessary improvements,

c) instances in which the appraiser is unable to determine the "as is" condition and appeal for work in progress or suspects adverse physical conditions (notify the

Anticipated Sales Price on the assumption that improvements will be completed in a workmanlike manner according to the Description of Improvements on Page

d) new construction not completed as of the Date of Value Opinion (base the

3 and any construction documentation provided to the appraiser).

b) appeal (e.g., personalized décor, colors, design, etc.);

client immediately); and

assignment.

STATEMENT OF LIMITING CONDITIONS, EXTRAORDINARY ASSUMPTION, AND APPRAISER CERTIFICATION

CONTINGENT AND LIMITING CONDITIONS:

The Appraiser Certification that appears in this appraisal report is subject to the following conditions:

- The appraiser will not be responsible for matters of a legal nature that affect either the subject property being appraised or the title to it. The appraiser assumes that the title is good and marketable and, therefore, will not render any opinions about the title. The subject property is appraised on the basis of it being under responsible ownership.
- The appraiser has provided a sketch in the appraisal report, to show approximate dimensions of the improvements. The sketch is included only to assist the reader of the report in visualizing the property and understanding the appraiser's determination of its size.
- 3. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in the appraisal report whether the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, expressed or implied, regarding this determination.
- The appraiser will not give testimony or appear in court because he or she
 made an appraisal of the subject property, unless specific arrangements to do
 so have been made beforehand.
- 5. The appraiser has noted in the appraisal report any adverse conditions (such as needed repairs, depreciation, the presence of hazardous wastes, toxic substances, etc.) observed during the appraisal inspection of the subject property and that he or she became aware of during the normal research involved in performing the appraisal. Unless otherwise stated in the appraisal report, the appraiser has no knowledge of any hidden or unapparent conditions of the property or adverse environmental conditions (including the presence of hazardous wastes, toxic substances, etc.) that would make the property more or less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, expressed or implied, regarding the condition of the property. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, the appraisal report must not be considered as an environmental assessment of the property.
- 6. The appraiser obtained the information, estimates, and opinions that were expressed in the appraisal report from sources that he or she considers to be reliable and believes them to be true and correct. The appraiser has made no survey of the subject property. The appraiser does not assume responsibility for the accuracy of such items that were furnished by other parties.
- 7. The appraiser will not disclose the contents of the appraisal report except as provided for in the Uniform Standards of Professional Appraisal Practice.
- 8. For new construction not completed as of the Date of Value Opinion, the appraisal report and valuation conclusion is based on the hypothetical condition that the improvements have been completed as of the Date of Value Opinion in a workmanlike manner according to the Description of Improvements on page 3 and any construction documentation provided to the appraiser. Because the proposed improvements have not been completed, the value of the subject property that actually exists as of the Date of Value Opinion may be different from the value with the proposed improvements completed. The appraisal does not address unforeseeable events that could alter the proposed property Improvements and/or the market conditions reflected in the analysis.

- 9. The intended users of the appraisal are only the appraiser's client and the employer. The appraiser assumes no responsibility or liability for unauthorized use of this report. The appraiser must provide his or her prior written consent before all (or any part) of the content of the appraisal report (including conclusions about the property value, the appraiser's identity and professional designations, and references to any professional appraiser organizations or the firm with which the appraiser is associated) can be used for any purposes by anyone except: the client specified in the report; professional appraisal organizations; or any department, agency, or instrumentality of the United States, any state, or the District of Columbia. The appraiser's written consent and approval also must be obtained before the appraisal (or any part of it) can be conveyed by anyone to the public through advertising, public relations, news, sales. or other media.
- 10. For the purpose of this appraisal, the effective date of the appraisal is the Date of Value Opinion. This allows the appraiser to consider pertinent information available between the Date of Appraisal Inspection and Date of Value Opinion.

EXTRAORDINARY ASSUMPTION

The Anticipated Sales Price assumes that no physical changes have occurred to the subject property between the Date of Appraisal Inspection and the Date of Value Opinion. The use of this assumption may affect the assignment results.

APPRAISER CERTIFICATION

I certify, to the best of my knowledge and belief:

- 1. The statements of fact contained in this report are true and correct.
- 2. The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions, and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
- I have no present or prospective interest in the property that is the subject of this report, and no personal interest with respect to the parties involved.
- 4. I have no bias with respect to the property that is the subject of this report or to the parties involved with this assignment.
- My engagement in this assignment was not contingent upon developing or reporting predetermined results.
- 6. My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.
- My analyses, opinions, and conclusions were developed and this report has been prepared in conformity with the Uniform Standards of Professional Appraisal Practice.
- 8. I personally inspected the property that is the subject of this report.
- No one provided significant professional assistance to the person signing this
 report. If there are exceptions, the name of each individual providing significant
 professional assistance is stated below.

CO-APPRAISER CERTIFICATION:

If a co-appraiser signed the appraisal report, he or she certifies and agrees that: I have reviewed the appraisal report, agree with the statements and conclusions of the appraiser, and am taking full responsibility for the appraisal and the appraisal report.
